

WHAT IS CLAIMED IS :

1. A memo block base and container with magnetic suspension device comprising :
a memo block base being provided for holding a memo
5 block, said memo block base being provided with at least
one magnetic article in the bottom; and,
a container being provided for holding said memo block
base therein, said container being provided with at least one
magnetic article in the inner bottom, and the upward pole
10 of said each magnetic article in said container being the
same as the downward pole of said each magnetic article
in said memo block base.

2. A memo block base and container with magnetic suspension device, as recited in claim 1, wherein
15 said memo block base is placed at the bottom of a memo
block or fixed to the bottom of a memo block.

3. A memo block base and container with magnetic suspension device, as recited in claim 1, wherein
flanges or position-fixing members are provided at the sides
20 of said memo block base.

4. A memo block base and container with magnetic suspension device, as recited in claim 1, wherein
flanged portions are provided at the side walls of said
container, and a sliding groove is provided in each said
25 flanged portion.

5. A memo block base and container with magnetic suspension device, as recited in claim 1, wherein an opening is provided in the rear of said container, and through holes are provided in the rear top end of said container for a positioning article to penetrate therethrough.

6. A memo block base and container with magnetic suspension device, as recited in claim 1, wherein a positioning portion is respectively provided at the top ends of the side walls of said container, and opposite positioning blocks are provided on the inner surface of the front wall of said container.

7. A memo block base and container with magnetic suspension device, as recited in claim 1, wherein each said magnetic article in said memo block base and said container has strong magnetism at the best.
